North Coast Health Center

EXCELLENCE IN ENDODONTIC CARE

Offering the Latest Technology in North County

Endodontics is a one of the nine specialties of dentistry by the American Dental Association and deals with the tooth pulp and the tissues surrounding the root of a tooth. Dr. Behnaz Cheikh's extensive training in the use of surgical operating microscopes offers increased magnification and illumination for all procedures. Whether they are evaluating the outside surface of a tooth for a crack, locating miniscule root canals, removing a broken file from a root canal, ensuring the canals are thoroughly cleaned, or filling the root canal systems, the microscope benefits treatment. Dr. Cheikh is also certified in Adult Oral Conscious Sedation to treat patients with anxiety. Her mission is to provide a highly caring and comfortable setting for patients.

"I'm excited to join such a comprehensive health center and the wonderful community of medical and dental practitioners in coastal North County."

Behnaz Cheikh, D.D.S.

Specialized Endodontic Training

Dr. Cheikh completed two years of Advanced Endodontic Residency at the University of Southern California School of Dentistry, USC, where she received extensive training in microscopic endodontic treatment. She has been practicing as an Endodontist for the past 5 years and moved her practice to North County San Diego in 2008. Dr. Cheikh received her Doctor of Dental Surgery degree with distinction from the University of Minnesota School of Dentistry in 1994. While in private practice in San Francisco, she obtained her AEGD certificate from the University of California in San Francisco, UCSF with an emphasis in Hospital Dentistry and Oral Medicine.
